

## The Purity

Lithia Spring Water flows from the earth into a giant basin, hewn from granite thousands of years ago, by the ancients. The basin is 25 feet deep and 20 feet wide. The water is pure, potentized by telluric energy, yet silky smooth and soothing to the taste. Each batch of Lithia Spring Water is drawn directly from the springs ancient basin to capture its freshness and purity.

Our water sanitation process uses space age anti-microbial micro-filtration technology and Ultraviolet germicidal (UVGI) filtration that assures there are no organic or biological contaminants. This high tech sanitation process retains the water's natural composition, flavor, and freshness while guaranteeing food safety.

Lithia Spring Water is Naturally Pure
